

ISG Environmental Policy

ISG is committed to providing quality services and products to its clients in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

Continual environmental improvements to our business operations will be achieved by setting environmental objectives and targets which will be monitored and reviewed through the Environmental Management System.

To achieve this we will:

- Integrate the consideration of environmental concerns and impacts into all of our decision making and activities
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner
- Train, educate and inform our employees about environmental issues that may affect their work
- Reduce waste through re-use and recycling and by purchasing recycled, recyclable or re-furnished products and materials where these alternatives are available, economical and suitable
- Promote efficient use of materials and resources throughout our facilities including water, electricity, raw materials and other resources, particularly those that are non-renewable
- Avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of
- Purchase and use environmentally responsible products accordingly
- Where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes
- Communicate our environmental commitment to clients, suppliers and the public and encourage them to support it
- Operate and maintain company vehicles with due regard to environmental issues as far as reasonably practical and encourage the use of alternative means of transport and car sharing as appropriate
- Actively prompt the use of new technology internally and amongst our clients to minimise the environmental impact
- Strive to continually improve our environmental performance and minimise the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities.

M Morrison
